

RFW 002: Installation of LED Warehouse Lighting System

Issued by: Simpson and Warner Logistics Ltd

Reference: RFW002-2025

Overview:

Simpson and Warner Logistics invites proposals for the supply and professional installation of a new LED lighting system within our 25,000 sq ft warehouse in Nottingham. The objective is to improve energy efficiency and light quality across operational zones.

Scope of Works:

- Site survey to assess current infrastructure
- Removal and safe disposal of existing lighting fixtures
- Design and supply of an LED high-bay lighting system
- Installation of fixtures, including electrical adjustments
- Testing and commissioning of all units

Requirements:

- Compliance with BS 7671 (IET Wiring Regulations)
- Lighting design to meet CIBSE standards for warehouse use
- All waste materials to be disposed of in accordance with environmental standards
- Contractor must provide proof of similar project experience

Deliverables:

- Completed installation with operational handover
- Lighting layout plan and spec sheets
- Warranty certificates and maintenance guide

Timeline:

- Work to begin within 2 weeks of contract award
- Installation to be completed within 10 business days

Payment Terms:

- 30 days from invoice date, upon sign-off of project
